Summary

Site Reliability Engineer at GDP Labs, passionate about building reliable and scalable systems. I enjoy solving problems, improving processes, and turning complexity into simple, dependable solutions. My journey has been shaped by hands-on experience, continuous learning, and a drive to grow through real challenges.

Technical Skills

Cloud & Infrastructure: AWS, GCP, Azure, Terraform, Ansible

Containers & Observability: Docker, Kubernetes, Prometheus, Grafana

Languages: JavaScript, TypeScript, Python, Go, Java, C#, Kotlin, PHP, C, SQL

Frameworks & Tools: .NET Core, Laravel, Gin, Node.js, Express.js, Flask, React, Git, Firebase, MySQL, PostgreSQL

Experience

Site Reliability Engineer

GDP Labs

South Jakarta

Feb 2026 – Present

- Designed and implemented CI/CD pipelines for new applications, troubleshoot build failures, and established efficient workflows to streamline deployment processes.
- Implemented AI-powered agents to streamline troubleshooting, enhance diagnostic efficiency, and prevent recurring issues through knowledge capture and reuse.
- Created and maintained comprehensive technical documentation covering system architecture, tools, and infrastructure, ensuring accuracy and clarity to support team understanding and engineering initiatives.
- Provisioned and conducted scalability testing across cloud infrastructure deployments, including Kubernetes clusters, to ensure reliability, performance, and robustness under varying workloads and operational demands.

Network Administration and Technical Support Staff

Software Laboratory Center, BINUS University

West Jakarta

Feb 2025 – Feb 2026

- Mapped and documented the organization's full network topology using CDP and LLDP, improving visibility and troubleshooting efficiency across the infrastructure.
- Built CI/CD pipelines with GitHub Actions and FluxCD, enabling automated integration and GitOps-driven Kubernetes deployments.
- Led the migration from Docker-based hosting to a fully managed Kubernetes cluster, strengthening reliability, observability, and deployment consistency.
- Designed a High Availability Galera database cluster for mission-critical applications, ensuring redundancy and zero-downtime failovers.
- Re-engineered the internal LINE Bot from an unstructured Express.js implementation into a modular Go service, significantly improving scalability, maintainability, and response performance.
- Managed internal web applications and standardized the deployment workflow for new systems, ensuring stable releases and reliable application lifecycle management.

PPTI Teaching Assistant (Computer Networks)

BCA Learning Institute

Sentul City

Jun 2024 – Nov 2024

- Delivered lectures and hands-on practicums in Computer Networks, covering subnetting, routing, ACLs, and troubleshooting, and reinforced learning through practicum-based assessments.

PPTI Teaching Assistant (Data Structures)

BCA Learning Institute

Sentul City

Jan 2024 – May 2024

- Taught core data structure concepts including linked lists, stacks, queues, hash tables, BSTs, AVL trees, heaps, and graphs, reinforcing understanding through reviews and practicum-based assessments.

Junior Laboratory Assistant

Software Laboratory Center, BINUS University

West Jakarta

Sep 2023 – Jan 2025

- Conducted practicum sessions, supporting students through technical concepts and hands-on laboratory work.
- Completed *Tes Progresif Asisten* (TPA), a structured self-development and competency-building program for laboratory assistants.
- Designed the System & Network Administration case for new assistant recruitment, featuring a full-stack web application (React TypeScript + Laravel), Docker Swarm orchestration, HAProxy load balancing, and MikroTik network configuration.
- Rebuilt “New RESMAN,” the laboratory resource management system, using React and .NET Core 8, modernizing workflows and improving maintainability.

Education

BINUS University

Bachelor of Computer Science

West Jakarta

Sept 2022 – Feb 2026

- **GPA:** 3.90/4.0
- **Thesis:** Leveraging IndoBERT and DistilBERT for Indonesian emotion classification in e-commerce reviews

Achievements

AI Impact Challenge Winner

GDP Labs

Apr 2026

Developed AI-powered agents that improved troubleshooting speed and diagnostic accuracy, enabling the team to reduce repeated issues through systematic knowledge capture.

Best Research Interest Group Leader – Odd 2024/2025

Software Laboratory Center, BINUS University

Aug 2025

Led a Research Interest Group to design and implement a Desktop Sharing system, optimizing performance and efficiency to enhance the computer laboratory learning experience, and earned the Best Research Interest Group award.

Best Research Interest Group – Even 2024/2025

Software Laboratory Center, BINUS University

Aug 2025

Recognized for designing and implementing a High Availability Galera Database Cluster that strengthened the organization’s backend infrastructure and improved system resilience.

Best Performing Assistant Diploma – Even 2023/2024

Software Laboratory Center, BINUS University

Aug 2024

Awarded as the top-performing assistant among 20 candidates for outstanding contributions, reliability, and excellence in supporting laboratory operations.
